

Ms Sue Scott

RN RM, BEd

Coordinator, Infection Prevention and Control Service at The Royal Children's Hospital, Melbourne, Australia

Ms Sue Scott trained as a paediatric nurse at the Royal Children's Hospital and as a midwife at the Mercy Maternity Hospital in Melbourne, Victoria, Australia.

Sue commenced working in Royal Children's Hospital Infection Control Department in 1989 undertaking a certificate course in Sterilization and Infection Control and now coordinates the Infection Prevention and Control Service at The Royal Children's Hospital (and the Royal Women's Hospital until November 2015).

The Royal Children's Hospital is the major specialist paediatric hospital in Victoria with care extending to children from surrounding states. There are approximately 46,000 inpatients per year. From 2007 Sue participated in planning and redesign for the new children's hospital which opened in November 2011.

The Royal Women's Hospital is Victoria's largest specialist hospital dedicated to improving the health of women of all ages and newborns babies with approximately 31,000 inpatients and over 7000 deliveries per year

Through Royal Children's Hospital International, Sue participated in providing an Infection Control consultative service to National Hospital of Paediatrics Hanoi, Vietnam and Ministry of Health between 2000 – 2008. This included supporting the implementation the hand hygiene program, surveillance activities and the development and introduction of a medical and nursing Infection Control training course.

Her interests include childhood infectious diseases, prevention of paediatric hospital acquired infections and immunisation.
